Memo

To: Pastors, Parochial Administrators, Parish Stewards, School Administrators
From: Glen Faulkner – Parish Security Coordinator
Date: February 3, 2025
Re: Free webinar – Protecting your Digital Life

The Northern California Regional Intelligence Center (NCRIC) is part of the Bay Area's threat assessment system. Like the Central California Intelligence Center, which covers all 20 counties in the Sacramento Diocese, the NCRIC works as a fusion center, offering threat assessments, training, analysis, and intelligence sharing to protect communities from human-caused threats.

I frequently promote training programs offered by these organizations covering active shooter response, handling bomb threat and SWATting incidents, and behavioral threat analysis – all designed to help protect parishes and schools from physical threats and attacks. The NCRIC is hosting a different type of training program offering information to protect your digital presence and identity.

Presented by Shadow Element, the NCRIC is presenting a one-hour webinar on digital privacy, security, and identity protection, including material on mitigating damage from data breaches and preventing identity theft.

Although the Sacramento Diocese sits outside the NCIC's operational area, they have extended the opportunity to participate in this webinar to our Diocese.

The webinar will be presented February 21 from 10:00 – 11:00 AM. Registration information can be found at www.movetotheshadow.com/webinar or on the attached flier.
