FREE WEBINAR

PROTECT YOUR DIGITAL LIFE: Expert Tips on Privacy, Security, and Identity Protection

Personal information leaked in data breaches, shared on websites by data brokers, and stolen by hackers, all pose a threat to the privacy and security of public safety employees.

Safeguarding and limiting information exposure is necessary to help public safety professionals and officials protect themselves and their families.

TOPICS DISCUSSED IN THIS FREE WEBINAR INCLUDES:

- **Online Information Removal:** Learn effective methods for removing personal data from websites, social media platforms, and data brokers to protect your digital footprint.
- **Preventing Identity Theft:** Explore strategies for safeguarding your personal information to prevent identity theft and mitigate risks from online exposure.
- **Data Breach Mitigation:** Understand how data breaches make you vulnerable and how to take steps to protect your sensitive data.
- **Tactics for Maintaining a Private Home:** Learn effective strategies to keep your home address private and disconnected from your personal identity.
